

Issues for https://www.google.com/

Executive Summary for https://www.google.com/

Overall Score: 77

Security: 65 Performance: 100 SEO: 51 Accessibility: 93

Top Priorities:

- Address missing critical security headers (CSP, HSTS) if flagged.
- Improve Core Web Vitals (LCP/TBT/CLS) where indicated.
- Provide essential SEO metas (title, description, canonical).
- Fix accessibility basics (alt text, ARIA roles, color contrast).

Detailed Issues:

Security Issues:

- [HIGH] Missing header: Content-Security-Policy: Define a CSP to mitigate XSS.
- [HIGH] Missing header: Strict-Transport-Security: Enable HSTS for HTTPS sites.
- [MEDIUM] Missing header: Permissions-Policy: Restrict powerful features.
- [MEDIUM] Missing header: Referrer-Policy: Control referrer leakage.
- [MEDIUM] Missing header: X-Content-Type-Options: Set to nosniff to prevent MIME sniffing.

Performance Issues:

- None detected

SEO Issues:

- [HIGH] Missing meta description: Add a concise summary
- [HIGH] Missing viewport: Add responsive viewport
- [MEDIUM] Missing <h1>: Add a single descriptive H1
- [MEDIUM] Missing rel=canonical: Add canonical to avoid duplicate content
- [LOW] Missing OpenGraph tags: Add og:title/description/image for social previews
- [LOW] Missing Twitter Card: Add twitter:card and related tags
- [LOW] No hreflang annotations: Add hreflang for multilingual pages

Accessibility Issues:

- [LOW] Form controls missing labels: 3 inputs without accessible label
